

CISS240: Introduction to Programming
Quiz q0102

Name: _____

This is NOT an open book quiz. You have 3 minutes.

Q1. The goal is correct to a C++ program by hand without the help of a C++ compiler software (such as MSVS). Correct the following program. The intended output is given below.
PROGRAM:

```
#include iostream

int Main()
(
    std::cout >> '2b or not 2b'

    return 0
)
```

INTENDED OUTPUT:

```
2b or not 2b
```

GRADING:

- Each correct deletion/insertion/modification is worth 1 point.
- Each incorrect deletion/insertion/modification is worth -1 point.
- Your total is normalized to 3 points. (I'm not telling you the total number of corrections.)
